

I'm a **Digital Product Designer** with 3+ years of experience designing delightful web & mobile solutions. My passion lies in bridging the gap between **Innovative Technology** and **Social Impact** through the power of **Design**.

## EXPERIENCE

### Interaction Design Intern

**GE Energy Connections**, Redmond, WA | June 2016 – September 2016

- Primary project involved the redesign of **e-terrasimulator Dispatcher Training Simulator** – a software used by electrical grid operators to simulate power distribution environments for training purposes.
- In alignment with a corporate initiative to redesign legacy software based on modern usability & interface design standards, the project entails the creation & design of new features & functionality as well as overall user experience improvements.

### UX/UI Designer

**Joomla**, Seattle, WA | June 2015 – June 2016

- Worked with various volunteers around the world on a redesign (usability & interface) project for the next web versions of Joomla CMS, **Joomla 3.5 & 3.6 (release in March & July 2016; ~15% increase in user retention)**.
- Participated in various desktop & mobile redesign projects for **Joomla.org & Joomla.com** - Joomla's primary websites - as part of an initiative to improve user sign up rates as well as branding.

### User Experience Designer

**VnExpress**, Seattle (Remote), WA | September 2013 – June 2015

- Helped design the information architecture, interaction, and visual for **VnExpress International (release in June 2015; 20 million-plus active users weekly)** - the English version of VnExpress, the most popular online news websites in Vietnam.
- Lead a design initiative for **VnExpress Mobile (release in September 2014; 1 million-plus downloads)** - the site's mobile app (iOS & Android). Ideated a concept through user research and took it through multiple design & test iterations before proposing to development.

### Marketing Analyst

**ComputeNext**, Bellevue, WA | March 2014 – June 2015

- Engaged with Managed Service Providers, IT Resellers/Distributors, and System Integrators around the adoption of **ComputeNext's Global Cloud Marketplace** – an end-to-end cloud sourcing, deployment, and management platform.
- Supported the UX team in conducting user research activities, as well as usability tests, to involve partners & clients in the development of the product.

## EDUCATION

### MS in Information Management (User Experience Research & Design)

**University of Washington, Seattle** | September 2015 – Present

### BA in International Studies (International Political Economy & Business)

**University of Washington, Seattle** | September 2012 – June 2014
