

I'm a **Digital Product Designer** with 3+ years of experience designing delightful web & mobile solutions. My passion lies in bridging the gap between **Innovative Technology** and **Social Impact** through the power of **Design**.

**EXPERIENCE****Interaction Design Intern**

GE Energy Connections, Redmond, WA | June 2016 – September 2016

- Primary project involved the redesign of **e-terrasimulator Dispatcher Training Simulator** - a software used by electrical grid operators to simulate power distribution environments for training purposes.
- Based on a corporate-wide initiative to transform legacy software design into new versions that more closely align with modern usability & interface design standards, the project entails the creation & design of new features & functionality as well as overall user experience improvements.

UX/UI Designer

Joomla, Seattle, WA | June 2015 – June 2016

- Worked with various volunteers around the world on a redesign (usability & interface) project for the next web versions of Joomla CMS, **Joomla 3.5 (release in March 2016)**, as part of the product development roadmap.
- Participated in various web & mobile redesign projects for **Joomla.org & Joomla.com** - Joomla's primary websites - as part of an initiative to improve user sign up rates as well as branding.

User Experience Designer

VnExpress, Seattle (Remote), WA | September 2013 – June 2015

- Helped design the information architecture, interaction, and visual for **VnExpress International (release in June 2015)** - the English version of VnExpress, one of the most popular online news websites in Vietnam.
 - Lead a design initiative for **VnExpress Mobile (release in September 2014)** - the site's mobile app (iOS & Android). Ideated a concept through user research and took it through multiple design & test iterations before proposing to development.
-
