Photoshop, Illustrator, Sketch, InDesign, Adobe Creative Cloud

UX TOOLS
Axure, OmniGraffle, Balsamiq, InVision, Justinmind

DEV SKILLS
PHP, Python, Ruby, MySQL

EXPERIENCE

UX Designer/Developer

CoSSaR, University of Washington | September 2015 – Present

- Designing & developing **a web-based disaster resilience decision support tool** for the Center for Collaborative Systems for Security, Safety, and Regional Resilience (CoSSaR).
- Working closely with disaster stakeholders to capture specific user requirements.
- Iterating on existing wireframes designed as part of a National Science Foundation resilience project on disaster recovery, as well as building low-fidelity interactive prototypes.
- Conducting usability testing to solicit feedback from potential users.

UX Design Assistant

Human-Centered Design & Engineering, University of Washington | September 2015 – Present

- Designing & developing **PlanSourcing**, a tool that supports social recommendations for the creation of personalized step-by-step behavior change programs, using crowdsourced data that people track about their behavior, as part of a directed research group.
- Driving the overall interaction design stages, including user interface design, as well as collaborating with team members to build an early functional prototype.

UX Designer

Joomla, Seattle, WA | July 2015 – Present

- Working on redesigning Joomla's websites (including implementation) – primarily **Joomla.org & Joomla.com** – as part of an initiative to improve user sign-up rates and branding.
- Participating in various feature redesign (usability & interface) projects related to **Joomla 3.5 & 4.0** – the next versions of Joomla CMS expected for release in November 2015 & 2016.

Business Development/Marketing Analyst

ComputeNext, Inc, Bellevue, WA | March 2014 – June 2015

- Drove sales & market development with reseller partners & clients around **ComputeNext Global Cloud Marketplace**, the company's flagship cloud brokerage/management platform.
- Assisted the User Experience Team in capturing user requirements, conducting user research, and usability testing.
- Strategically closed the company's first two deals in its history of operation.

EDUCATION

MS in Information Management (UX Design & Information Architecture)

University of Washington, Seattle | September 2015 – Present

BA in International Studies (International Political Economy)

University of Washington, Seattle | September 2012 – June 2014
